**Subject:** FW: update on meeting with Powertech today  
**Attachments:** Dewey-Burdock Uranium ISR Timeline.110414Status.pptx

Here is an updated timeline I drafted that has been reviewed by Lucita, Jim H. and Valois. We can discuss if you have any questions, etc. during our one on one this week or next. Please note the timeline is looking forward from November 4<sup>th</sup> when we next meet with Callie.

I would consider the permit and AE-related issues we discussed with Powertech today resolved once we get a formal letter from them on how each issue is being addressed.

Sadie:

Thanks for passing on this info.

I look forward to our next discussion about Dewey in early Nov.

**Subject:** update on meeting with Powertech today

According to Douglas and Valois, the meeting with Powertech officials went very well. They discussed the two issues we briefed you on last week – current source well and surface impoundments. Powertech understood our concerns and were willing to plug and abandon the well and were agreeable to the need for the surface ponds to comply with RCRA standards. We should be getting a request to revise/update their application on these issues as soon as next week. They brought up timing again but we did not provide a specific answer.
